Sustainability Matrix  
Los Altos, CA

## Bob Berkebile FAIA

**bnim** ARCHITECTURE

Any list of accomplished, influential architects and environmentalists includes Bob Berkebile. Highly regarded by fellow professionals and the recipient of numerous awards, Bob focuses on improving the quality of life in our society with the integrity and spirit of his work.

He is a founding principal of BNIM, which received the 2011 AIA Firm Award, and he brings more than four decades of experience to the architectural profession. He is the founding chairman of the American Institute of Architects' National Committee on the Environment (AIA / COTE) and was also instrumental in the formation of the US Green Building Council and its LEED rating system.

Since retiring from BNIM, Bob has remained active in development efforts in Kansas City. He is currently leading the redevelopment of Westport Middle and Westport High Schools, which will become Westport Commons. This ambitious, innovative development is a leading example of urban acupuncture — an intervention in the form of a community asset that sparks the remaking of the community that surrounds it.
