## April Darbyshire AIA

**bnim** ASSOCIATE | DESIGN

April Darbyshire is a designer at the BNIM Kansas City office. April's leadership style, integrated approach to design excellence, and generosity in her mentorship contribute greatly to BNIM's core values as a practice. April's work includes Johnson County Community College Career and Technical Education Center and Fine Arts and Design Studios, Westport Commons, the Center for Connected Learning at Moffitt Library for UC Berkeley, and multiple projects for the Thunder Valley Master Plan.

Recently, April served as a key team leader on a new complex of facilities for Missouri State University's Ozarks Education Center at Bull Shoals Field Station. This project provides a location immersed in the unique landscape of the Ozark Mountains for education and research by MSU faculty and students, other universities, and non-profit organizations.

April graduated with a Master in Architecture from Kansas State University. During school she studied abroad in Italy where she focused on the human body and how it perceives the built environment.
