## Ashley Lawrence

**bnim** INTERIORS + DESIGN PROFESSIONAL

With a Master of Architecture and Bachelor of Interior Design, Ashley thrives through client engagement to create a strategic project vision. She believes in a human-centered design approach, which fosters innovation and enhances work force growth and wellbeing, while also being critical to a successful design solution. Ashley is also interested in building performance analysis — an approach that uses iterative tests, analysis, and studies during design to measure future environmental impact and performance.

Ashley's professional experience includes an array of projects with focus on workplace design and adaptive reuse buildings. Her most recent work includes Westport Commons, recently featured in the New York Times as the largest co-working space in the world, and Building Positive, an urban acupuncture and adaptive reuse office project designed to be LBCv4, LEED Platinum, Sustainable Sites, and WELL Building Certified.
