Jason Kruse AIA LEED AP BD+C

bnim ARCHITECTURE

Jason is committed to the connection between people and place. His approach towards design focuses on how spaces work within the environment, but also how people will ultimately function within the space. To achieve this, he understands that it takes an interdisciplinary team to create innovative and human-centered design solutions.

While at BNIM, Jason has played a significant role in the design, documentation, and implementation of numerous projects, including an addition to University of Iowa College of Engineering, a new Psychological and Brain Sciences building at the University of Iowa, and a complete interior renovation of the Des Moines Community Playhouse.
