Artist Collaboration  
Kansas City, MO

Laugh-O-Gram Studio  
Kansas City, MO

YMCA Lyric Renovation Study  
Kansas City, MO

## Jeremy Knoll AIA LEED FELLOW

**bnim** ASSOCIATE PRINCIPAL

Jeremy is an experienced leader at BNIM with a deep passion for green building, historic preservation, and social equity. He has served as the primary sustainability and LEED consultant on dozens of projects worldwide, and he serves as a volunteer leader nationally with Design Corps, Inc., regionally with Climate Action Kansas City, and locally with the US Green Building Council.

At BNIM, Jeremy has focused on the adaptive reuse, renovation, and expansion of historic buildings in Downtown Kansas City into K-8 charter schools — Crossroads Academy and Quality Hill Academy — as well as feasibility studies for the Lyric Opera building for the YMCA and Laugh-O-Gram Studio, Walt Disney's first animation studio.

Jeremy also led the Bancroft School Redevelopment, a project developed by a strategic partnership between Dalmark Group and Make It Right, which resulted in the historic renovation of an abandoned Kansas City school and new construction, providing a neighborhood with affordable and LEED Platinum-certified apartments, a health clinic, neighborhood association offices, and other facilities.
